

Professional Summary

Frontend-heavy Full Stack Developer with 6.5+ years of experience building scalable web and mobile applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing modern UIs with React.js/React Native, while also contributing to RESTful APIs, backend systems, and AWS cloud deployments. Experienced in CI/CD, performance optimization, and production monitoring with Sentry and Datadog. Strong advocate of clean code, agile collaboration, and delivering fast, user-friendly digital experiences.

Skills

Languages	Javascript and Typescript, Python, Java
Core	Datastructures, Algorithms, Microservices, TDD
Frameworks	Frontend : React.js, React Native, Next.js, Redux & Redux toolkit. Backend : Node.js, Express, Koa.js, GraphQL, tRPC & WebSockets.
Testing	Jest and React testing library
Databases & Cache	SQL : MySQL, Postgresql NoSQL : Mongoddb, Aerospike & Elasticsearch Cache : Redis
Containerization	Docker, Kubernetes
Message Broker	RabbitMq
Tools&Plugins	Strapi, J-Meter, Postman, Swagger, SonarLint, Jest, Docker, Sentry, Mixpanel, Datadog, Bitrise
VersionControl	Git, Bitbucket and Github
Cloud Infrastructure	AWS, GCP APIServicesand Firebase

Professional Experience

<div>Divisions Maintenance Group</div> <div>SDE 2</div> <div>Product - DMG Pro app and DMG Control Center Portal</div>	Jan 2024 to Feb 2025
--	----------------------

DMG pro app is designed for technicians across various handyman services across US.React native based cross platform app and Next js based web app for control center.
Stack : React Native,React js, Next js, Styled Components, Redux, Node js, Kafka, CI/CD, Sentry, Datadog

Responsibilities :

- Implemented Silent Notification, VPN detection and Image stamping using native modules.
- Developed a bottom sheet component with templates, Mixpanel analytics, and Sentry logging support.
- Developed and deployed a UI kit NPM library for internal usage.
- Initialized Storybook setup with on-device controls and component stories to support isolated UI development.

- Integrated robust error tracking using Sentry with tags, extras, error codes, API enums, and centralized Sentry module.
- Monitored Sentry and Datadog after every release to instantly detect and fix production issues.

PhonePe Private Limited (Fintech)

Aug 2022 to Jan 2024

Software Engineer

Product - Indus App Store

Indus App Store by phonepe (formerly powering Samsung devices) is a native Android-based mobile app store, designed to fulfill the localized and cultural needs of Indian consumers.

Stack : React js, Next js, Tailwind css, Redux toolkit, Node js, Koa js, Aerospike, Elasticsearch, Redis, Kafka, CI/CD

Responsibilities :

- Key contributor to Indus Appstore Developer Platform involved in design, development and deployment.
- Migrated the entire data and business logic from MongoDB to Aerospike and Elasticsearch.
- Collaborated with multiple pods, integrating and worked on phonepe internal tools and technologies to ensure production ready code while improving nfrs like security and performance.
- Developed internationalization following i18n standards for 13 languages.
- Improved webapp's performance by improving core web vitals (LCP, INP and CLS)
- **Key Achievement :** Built Analytics module and User events module for developer dashboard from scratch.

Basidia Learning Pvt Ltd (Edtech)

Feb 2020 to Aug 2022

Software Engineer Team Lead

Products - Basidia and Basidiamed

Basidia & Basidiamed is an online e-learning application for educating NEET UG and MBBS students with a 100,000+ and 10,000+ installs on Google Playstore.

Stack : React js, Next js, Tailwind css, Redux, Node js, Express, Postgresql, Mongoddb, Redis, RabbitMQ, CI/CD, AWS, GraphQL

Responsibilities :

- Communicating with the stakeholders every day to bring their idea to a production-ready feature.
- Assisted in requirement analysis, high level design, low level design and developed 20+ modules in 2 applications and scaled from 0 to 100,000 users.
- Worked along with and lead a team of 12 members to design, develop, and deploy landing pages, web applications, admin panels, dashboards, and APIs.
- Deploying and maintaining 7+ backend services.
- Developed multiple admin dashboards of 20+ modules.
- Ensuring coding standards and code quality by code reviews of peers.
- Built a flowchart webapp built using React, D3.js, Node.js, and PostgreSQL.
- Designed & developed the entire app in MVC, independently.
- Razorpay payment gateway integration
- Troubleshooting network, security and performance issues for frontend and backend.
- **Key Achievement :** Optimized AWS and code to reduce server cost by 40%.

Tekzie is a service-based startup that develops and delivers full-stack web, mobile application, and also provides digital marketing solutions.

Stack : React js, Redux, Node js, Express, Postgresql, AWS, HTML, Bootstrap, JQuery

Responsibilities :

- Designed, and developed multiple responsive websites and webapps using React.js.
- Worked on multiple Node.js projects developing CRUD APIs.
- **Key Achievement :** Improving website's performance and SEO by improving core web vital of website.

Education :

Completed the Bachelor of Engineering at Kathir college of Engineering., Affiliated by Anna University Chennai. (2014-2018)

Certifications and Course completed :

- Completed the course - Modern React with Redux (Stephen Grider)
- Completed the course - NodeJS The Complete Guide (Maximilian Schwarzmüller)

Languages :

English, Tamil, Hindi (Basic)

Personal Info :

DOB : 15/03/1996
